

# UX/UI Designer to NCS Colour

Do you want to take the lead in designing the next generation's colour tools for Interior design, Architecture, Product design and DIY home decoration? NCS Colour is now looking for a dedicated UX/UI Designer with a passion for colour to join our team in Stockholm.

## ABOUT US

NCS Colour is the company behind the NCS System, the Universal Language for Colour that is used by professionals globally to specify the colour of product, spaces and brands. Our colour design solutions are sold in over 80 countries worldwide and our customers range from global brands to local manufacturers, including Jotun, PPG, IKEA, Nobia, H&M, Electrolux and Mercedes-Benz. With increased business from digital products and services, we are now looking for a UX/U Designer to join our growing product team.

## ABOUT THE ROLE

As UX/UI Designer at NCS Colour you will have a leading role in shaping how our users interact with NCS on digital platforms and in digital tools. You will be the voice of user in development projects with the responsibility of translating user insights into actionable design assets and concepts. You will have the overall responsibility for the user experience of our digital products, which includes the usefulness and usability as well as the overall look and feel. The role also includes collaborating with marketing to evolve the NCS Style Guide to support our ongoing effort strengthen the visual expression of NCS throughout all brand touchpoints.

To succeed in the role, we believe that you are triggered by the challenge of understanding a wide range of different type of users, who differ in both knowledge, cultural background and type of industry. You are not afraid of diving deep into the technical aspects of working with colour, making such information understandable and accessible to our user, and to work with the emotional aspects of colour such as inspiration and trends.

## RESPONSIBILITIES

- Gather, sort and share user insights relating to our product offering
- Translate insights into ideas, concepts, prototypes and ultimately design assets.
- Create effective and impactful interfaces and interactions, from user flows and wireframes, to final assets.
- Work with product manager to understand and prioritize user and customer needs.

- Work with engineers to find new and elegant solution when solving user needs.
- Collaborate with marketing to constantly improve the NCS style guide for digital products, making it a useful and powerful tool to ensure that all our products reflect the NCS visual identity.
- Cooperate with product manager, engineers, marketeers and end-users to build a world-class product portfolio and ecosystem.

#### WHO ARE YOU?

We are first and foremost looking for a driven person who are passionate about creating cutting edge digital experiences and who would love to learn everything there is to know about designing with colour. However, we think that you:

- Have a relevant educational background or previous work. experience from designing mobile and web applications.
- Have a portfolio of interface & user experience design to show.
- Have experience working with end-user studies, user research and data.
- Have experience working with wireframing and prototyping tools.
- Have experience working in Adobe XD, Sketch, Zeplin or other relevant graphical tool.
- Are a strong advocate for end-user needs and have an eye for details that makes a product more enjoyable to use.
- Speaks fluent English and/or Swedish, and possibly speak one or more additional languages.

#### ABOUT THE POSITION

The position is a full-time, 6-month project position.  
You will be based in our office in Stockholm.

Are you our new UI/UX Designer? We are looking forward to receiving your application, including personal letter, CV and portfolio.
